

PEOPLE + TECHNOLOGY + A BRIGHTER TOMORROW

Where technology and success intersect.

Connected technologies. Shared ambition.
One common goal: your success.

Your partner from strategy to everyday value.

COMPANY PROFILE + SOLUTIONS PORTFOLIO / 2026

PEOPLE + TECHNOLOGY + PURPOSE

Your technology partner. From strategy to support.

A Philippine solutions provider connecting business goals with the products, platforms and services that make them possible.

Established 2010

Intersect I.T. Solutions began as Intersect Information Technology Services, with roots in web development and cloud hosting. Today, we serve organizations across the Philippines and select international markets.

More than a portfolio. A connected path to success.

We intersect technologies, vendors, people and organizations around one common goal: helping your business succeed.

Our mission

Empower organizations with practical, secure and scalable technology that improves operations, supports people and enables growth.

Our vision

Create more connected, productive and resilient organizations through trusted technology partnerships.

Customer focus • Innovation • Integrity • Excellence

Christ-centered service

ONE ACCOUNTABLE TECHNOLOGY RELATIONSHIP

Eight pillars. One connected business.

Capabilities that support your operations, protect your information and prepare you for growth.

IT infrastructure and data center

Compute, connectivity, virtualization, storage and recoverability.

01 / EXPLORE 06, 08-10, 20

Cloud solutions

Public, private and hybrid environments built around your workloads.

02 / EXPLORE 12

Enterprise IT procurement and deployment

Devices, licensing, printing and site technology with coordinated rollout.

03 / EXPLORE 13

Business applications and ERP

Connected processes, digital channels and useful management information.

04 / EXPLORE 05, 11, 19

IT strategy and project management

A clear roadmap, controlled delivery and confident adoption.

05 / EXPLORE 16

Managed IT services

Operational support, proactive maintenance and continuous improvement.

06 / EXPLORE 15, 20

Cybersecurity and physical security

Protection for your systems, information, people and facilities.

07 / EXPLORE 07, 17-18

Collaboration and productivity

Voice, video, shared workspaces and efficient document workflows.

08 / EXPLORE 14

GLOBAL TECHNOLOGY. BUSINESS IMPACT.

Featured Products

Selected product families, supported by a broad ecosystem that lets us design the right combination for your business.

Business applications

Connect CRM, sales, finance, inventory, manufacturing and digital commerce.

OFFICIAL ODOO PARTNER

Networking

Secure, manageable connectivity across offices, campuses and branches.

CISCO PARTNER

Cybersecurity

Coordinated endpoint, firewall and security operations for a safer business.

FEATURED PRODUCTS

SANGFOR

Infrastructure and virtualization

Modernize compute, virtualization, storage and private cloud platforms.

FEATURED PRODUCTS

Storage and data services

Consolidate business files, application data, backups and archives.

FEATURED PRODUCTS

Backup and recovery

Protect workloads with backup, replication and tested recovery workflows.

FEATURED PRODUCTS

PILLAR 04 / FEATURED PRODUCTS

Business applications and ERP

Connect your customer journey, daily operations and management information in one coordinated environment.

Odoo 20 dashboard concept

Engage

CRM + sales

Operate

Stock + purchasing

Deliver

Projects + production

Measure

Finance + insights

Odoo business applications

CRM, sales, accounting, purchasing, inventory, manufacturing, projects, HR, websites and eCommerce, configured around how your organization works.

Beyond the core ERP

Acumatica, ZKTeco payroll and attendance, HRIS, property management, learning platforms and custom business applications extend the solution to your operating needs.

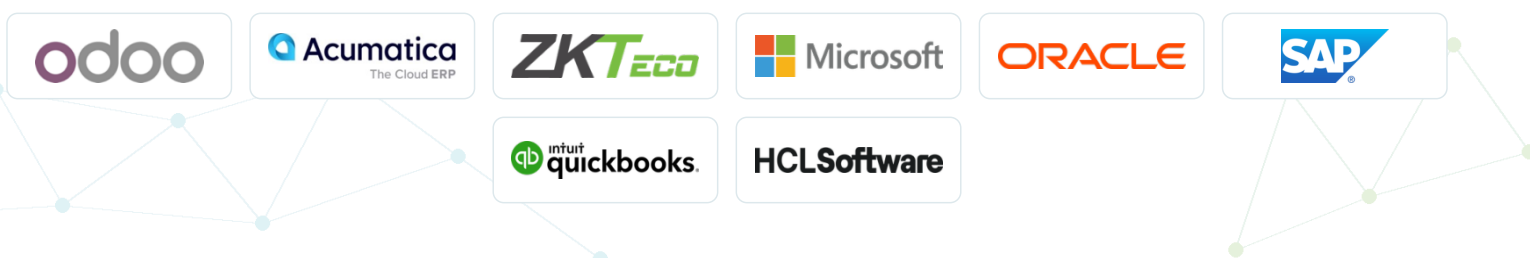

Implementation that fits

Process discovery, configuration, data migration, customization, API integration, user testing and training, with clear milestones and ownership.

Adoption and ongoing value

Role-based workflows, useful reports, management dashboards and support help your team use the new system with confidence.

PRODUCTS AND PLATFORMS

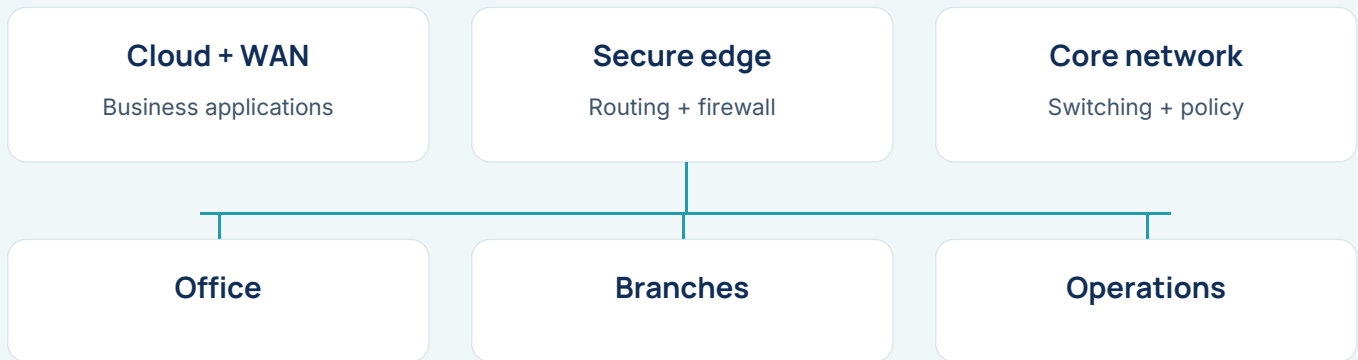

PILLAR 01 / FEATURED PRODUCTS

Networking and connectivity

Connect every site, user and workload through a network designed for performance, security and growth.

FROM THE INTERNET EDGE TO EVERY USER

Cisco networking

Switching, routing, wireless, secure access and branch connectivity, with design, deployment and operational handover from Intersect.

Campus and branch networks

Cisco, HPE Aruba Networking and other enterprise platforms support Wi-Fi, guest access, segmentation, SD-WAN, VPN and network management.

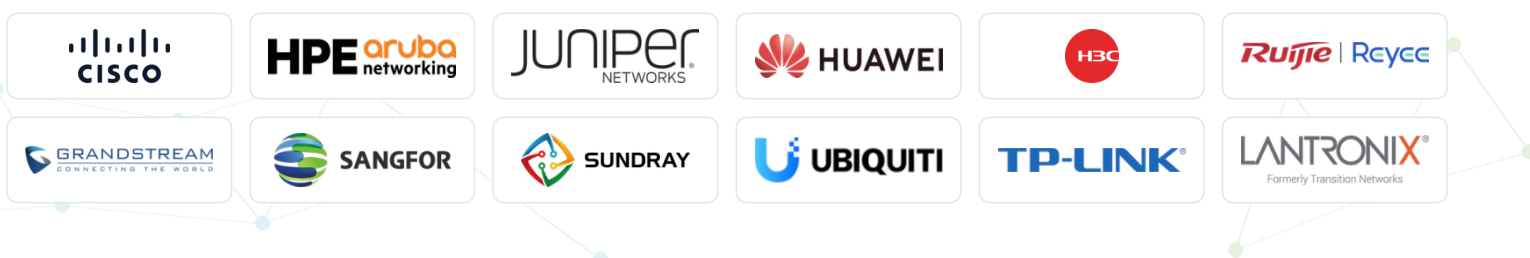

Industrial and specialist connectivity

Industrial switches, cellular gateways, modems, optics, P2P/PTMP wireless and FTTX options extend the network to demanding locations.

A dependable physical foundation

Copper and fiber cabling, racks, patching, labeling, testing and documentation make networks easier to operate and expand.

PRODUCTS AND PLATFORMS

PILLAR 07 / FEATURED PRODUCTS

Cybersecurity

Protect the business through coordinated controls across identities, endpoints, networks, applications and information.

Identity + access

MFA • privileged access • security keys

Endpoints + networks

EDR/XDR • firewalls • secure connectivity

Data + applications

DLP • email • web and cloud protection

Detection + response

Monitoring • investigation • escalation

Sophos protection and operations

Endpoint security, EDR/XDR, firewalls, email protection and managed detection and response options, supported by deployment and policy administration.

Data Resolve information protection

inDefend supports data leakage prevention, insider threat visibility and endpoint activity monitoring, with reporting and policies aligned to your organization.

Identity and secure access

Yubico security keys, multifactor authentication, privileged access, zero trust access and identity controls strengthen protection around users and critical systems.

Assess, detect and respond

Vulnerability assessment, penetration testing, threat hunting, SOC/MDR and incident readiness are available through appropriate specialist and vendor services.

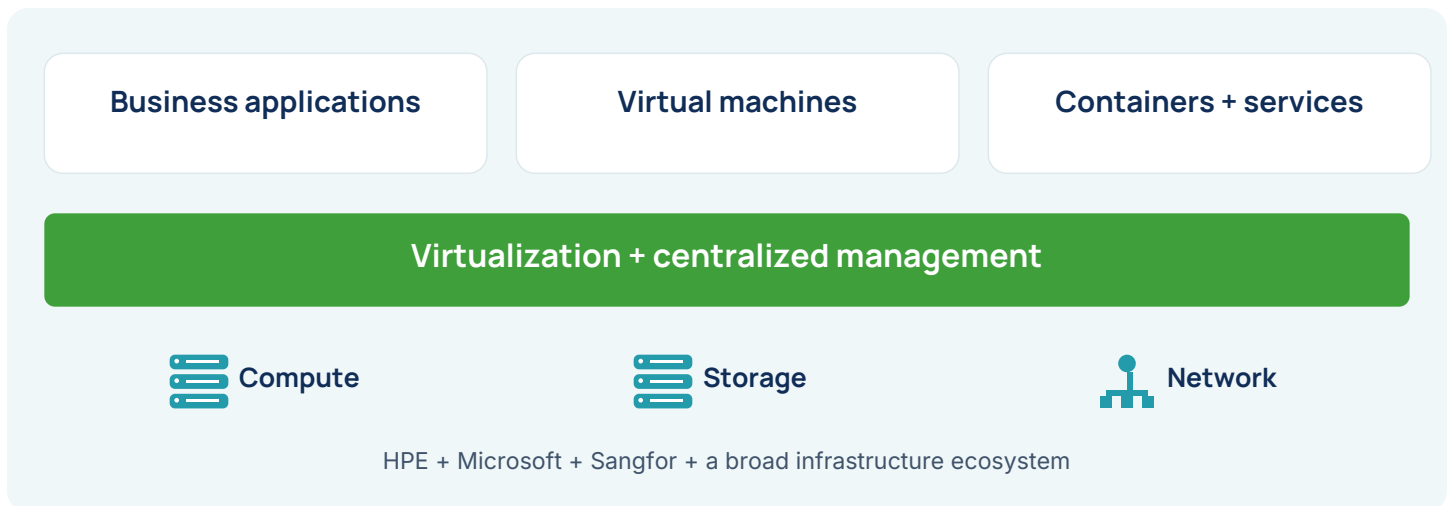

PRODUCTS AND PLATFORMS

PILLAR 01 / FEATURED PRODUCTS

Infrastructure and virtualization

Build a flexible foundation for business applications, critical workloads and the next stage of your growth.

Sangfor cloud and infrastructure

HCI, server virtualization, enterprise storage, VDI, container platforms and private or hybrid cloud options support infrastructure modernization.

Compute and platform choice

HPE ProLiant and GreenLake, Dell, Huawei, H3C and Supermicro; Microsoft Windows Server and Azure, Proxmox, Nutanix and VMware broaden platform choice.

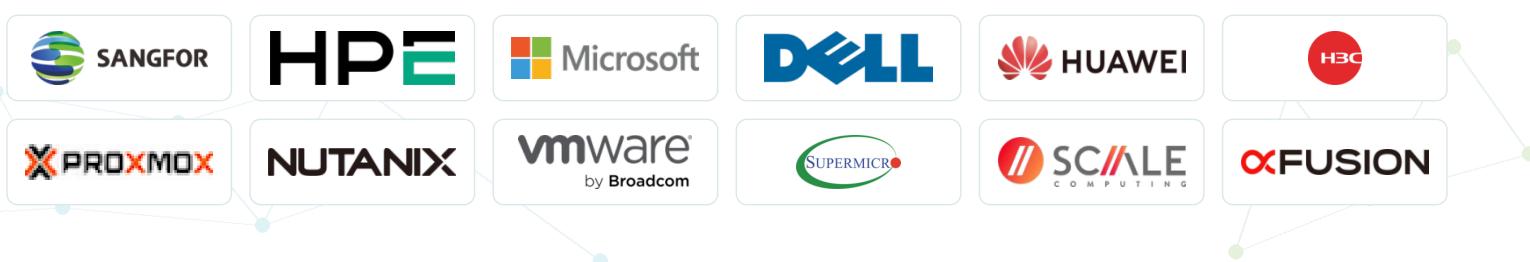

Data center and server room

Servers, racks, UPS, PDUs, cooling coordination, structured cabling and monitoring are brought together as a working environment.

Controlled migration

Discovery, sizing, compatibility checks, staged migration, rollback planning and application validation protect the transition to your chosen platform.

PRODUCTS AND PLATFORMS

PILLAR 01 / FEATURED PRODUCTS

Storage and data services

Make information available, protected and manageable as your data, applications and retention requirements grow.

DESIGNED AROUND THE DATA LIFECYCLE

Create + share

Files • databases • workloads

HPE Alletra storage

Protect + retain

Snapshots • backups • archives

Manage + govern

Access • capacity • lifecycle

QNAP storage solutions

Business NAS and enterprise platforms support shared files, application storage, surveillance, backup repositories, snapshots and archives.

HPE enterprise storage

HPE Alletra, MSA and StoreEasy families broaden options for enterprise arrays, shared storage and file services, matched to workload and availability needs.

A wider data portfolio

Synology, LTZero, Huawei, Dell, Hitachi Vantara, NetApp, VAST, Scality, Quantum, Toshiba and Seagate extend capacity, management and performance choices.

Design around the data

Capacity planning, storage tiers, access rights, high-speed connectivity, migration, retention and recovery planning create a practical data lifecycle.

PRODUCTS AND PLATFORMS

QNAP®

SEAGATE

PILLAR 01 / FEATURED PRODUCTS

Backup and recovery

Keep recoverability at the center of your continuity plan, from individual files to critical business services.

NAKIVO Backup and Replication

Protect supported virtual, physical, cloud and Microsoft 365 workloads with scheduled backups, replication, recovery testing and centralized administration.

Recovery options across platforms

Vinchin, Veeam, Sangfor, Commvault, Cohesity, Rubrik and other platforms extend the choices for workload protection and disaster recovery.

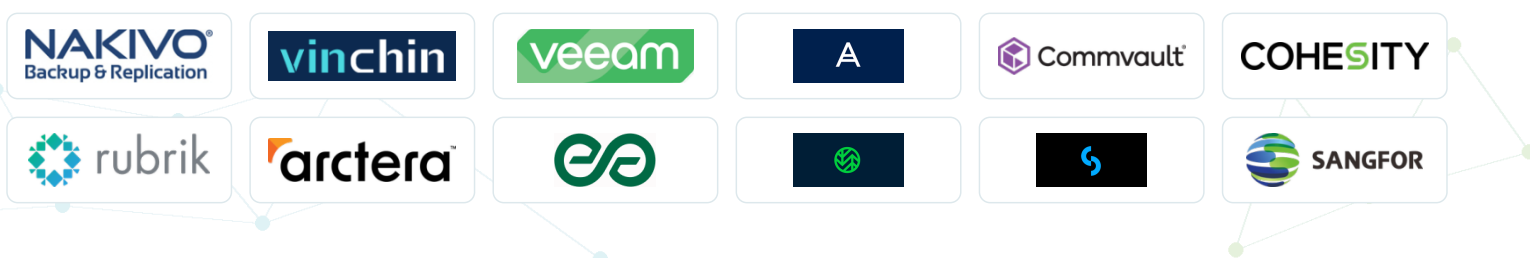

Resilient backup architecture

Local and offsite copies, supported immutable repositories, retention policies and access controls reduce exposure to accidental loss and malicious deletion.

A recovery plan you can execute

Agree recovery point and recovery time objectives, test restored services, document responsibilities and plan failover, failback and operational handover.

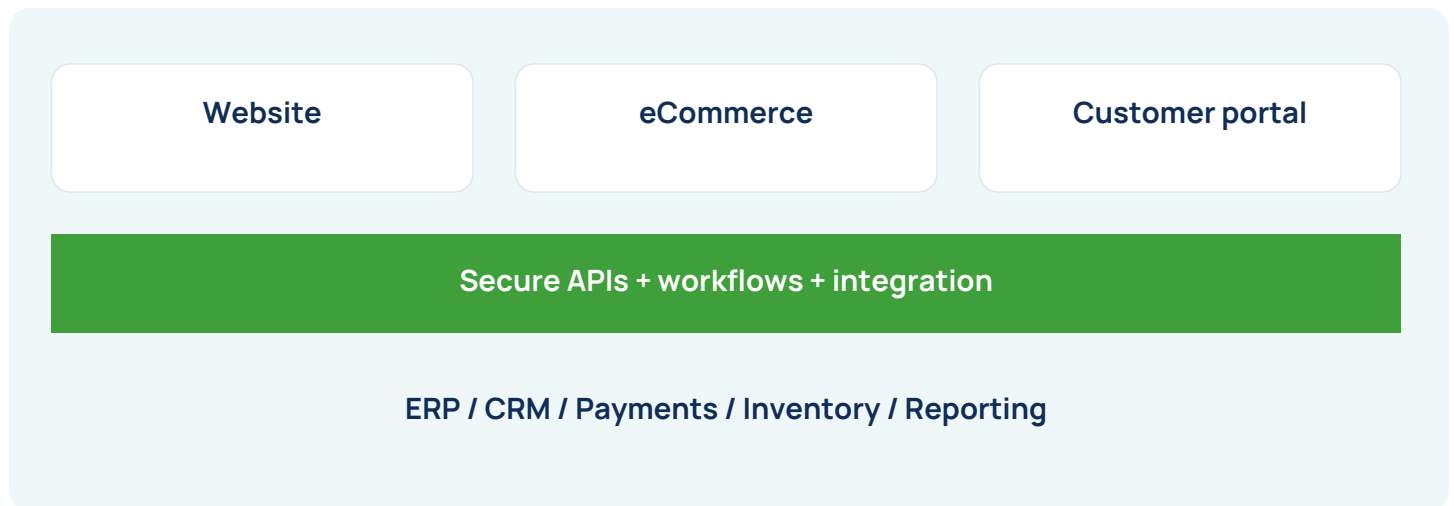

PRODUCTS AND PLATFORMS

PILLAR 04 / DIGITAL SOLUTIONS

Web technology and digital solutions

Bring customer-facing channels, business workflows and data together to create a better digital experience.

Websites and digital commerce

Corporate websites, eCommerce, customer portals, content platforms and web applications connect your market presence with the systems behind it.

Custom development and integration

Business applications, secure APIs, mobile workflows, data exchange and automation help bridge gaps between existing platforms.

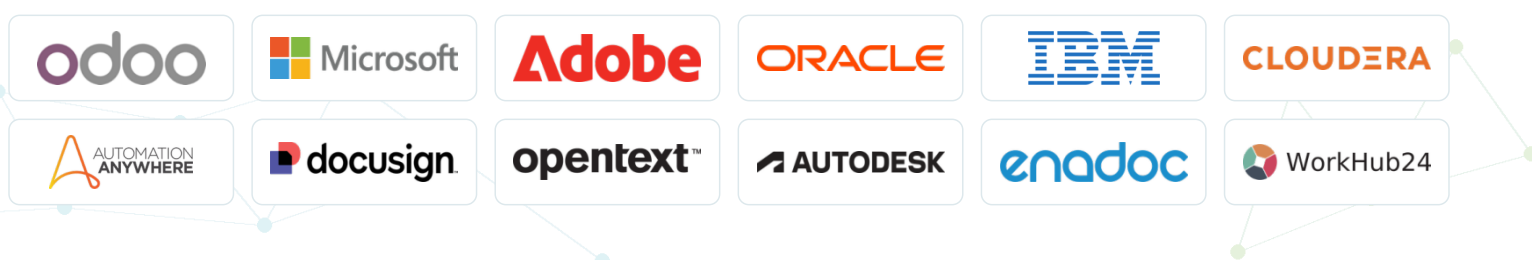

Information and automation

Analytics, business intelligence, databases, document management, e-signatures, RPA and AI-enabled workflows support better decisions and less repetitive work.

Design, launch and improve

Discovery, UI/UX, development, hosting, testing, content support, analytics and ongoing maintenance give your digital platform a clear operating plan.

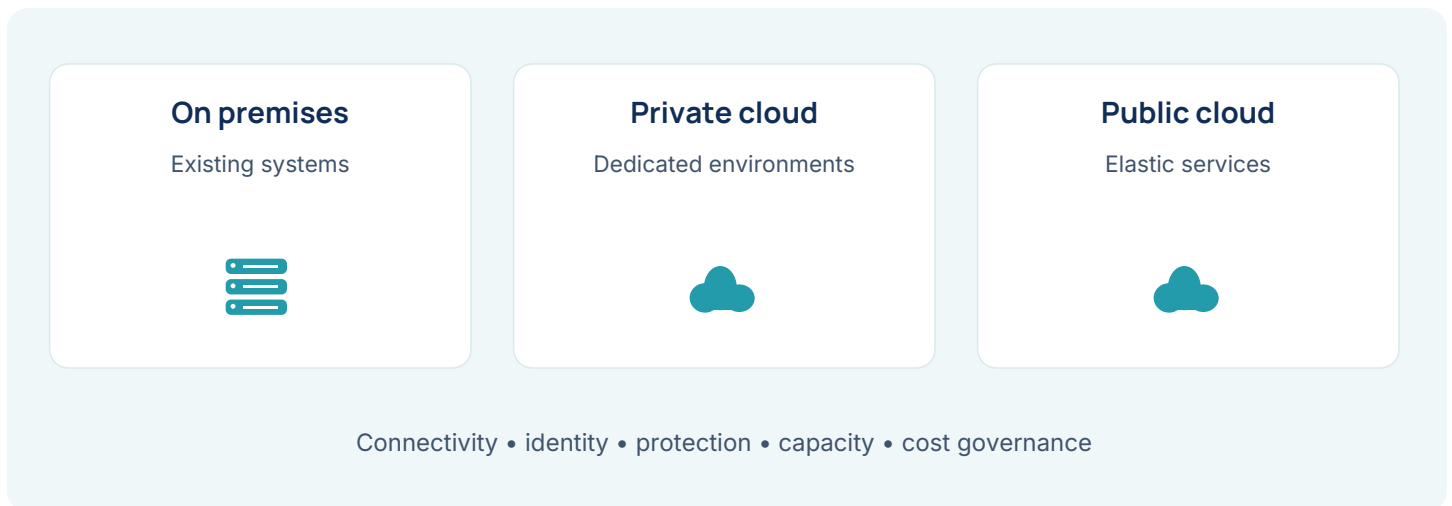

PRODUCTS AND PLATFORMS

PILLAR 02 / CLOUD SOLUTIONS

Cloud solutions

Choose the right environment for each workload and connect it to your people, applications and data.

Public cloud and platforms

Microsoft Azure, AWS, Google Cloud, IBM Cloud and Oracle Cloud support compute, storage, databases, application services and development environments.

Intersect Private Cloud

Intersect Private Cloud provides hosted workloads and managed environments. HPE GreenLake and Huawei Cloud broaden hybrid options around business requirements.

Hybrid connectivity and migration

Assessment, landing zones, workload migration, private connectivity, DNS, Cloudflare services and backup connect existing systems with cloud environments.

Manage the environment over time

Identity, security configuration, monitoring, capacity, cost review and continuity planning keep cloud services aligned with business priorities.

PRODUCTS AND PLATFORMS

PILLAR 03 / PROCUREMENT AND DEPLOYMENT

IT procurement and deployment

Equip your workforce and sites with the right products, supported by coordinated sourcing, rollout and lifecycle services.

Specify

Requirements + licensing

Source

Products + suppliers

Deploy

Staging + installation

Maintain

Warranty + lifecycle

Computers and mobility

Notebooks, desktops, workstations, thin clients, tablets, mobile devices, displays, peripherals, components and accessories for different roles and sites.

Printing, imaging and capture

Epson, Canon, Printronix, Ricoh and HP, plus enterprise scanning, barcode, label, POS, document capture, consumables and supplies.

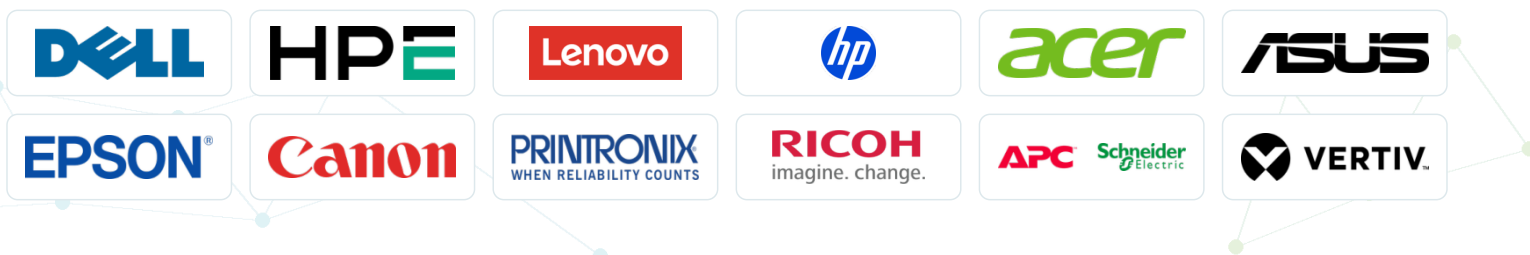

Power and connected facilities

UPS, PDUs, batteries, portable power and selected solar solutions support workplace continuity; server-room facilities are coordinated through our infrastructure pillar.

From specification to support

We coordinate product selection, licensing, supply, staging, installation, user handover, warranty cases and refresh planning.

PRODUCTS AND PLATFORMS

PILLAR 08 / COLLABORATION

Collaboration and productivity

Give teams a consistent way to communicate, share information and work together across locations.

Hybrid meetings. Shared ideas.

Zoom, Microsoft Teams, Cisco and Huawei IdeaHub bring people, content and spaces together.

Business voice and telephony

IP PBX, VoIP, SIP gateways, IP phones, contact center options, intercoms and call management for offices and branches.

Video and meeting spaces

Zoom, Microsoft Teams, Cisco collaboration and Huawei IdeaHub support hybrid meetings, smart screens, content sharing and productive meeting rooms.

Email, files and knowledge

Microsoft 365, Google Workspace, Zimbra, Carbonio and document platforms support shared workspaces, secure access, migration and adoption.

Operational communications

Public address, IP paging, radio communications, SMS gateways, IT notifications and business messaging help keep people informed and responsive.

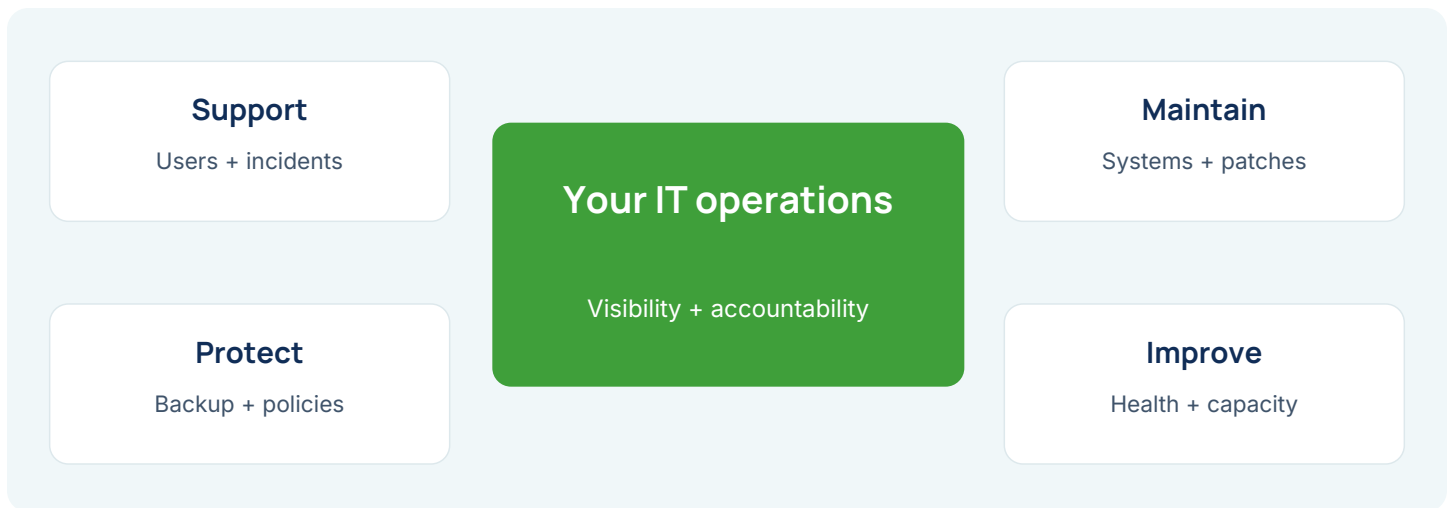

PRODUCTS AND PLATFORMS

PILLAR 06 / MANAGED IT SERVICES

Managed IT services

Extend your team with dependable technical support, proactive maintenance and clear ownership of everyday IT work.

User and service support

Helpdesk, remote assistance, onsite support, incident handling and service requests, with defined escalation and communication paths.

Infrastructure operations

SolarWinds, Auvik and Domotz support monitoring; NinjaOne, ConnectWise, BMC, FileWave and Hexnode extend endpoint and service management.

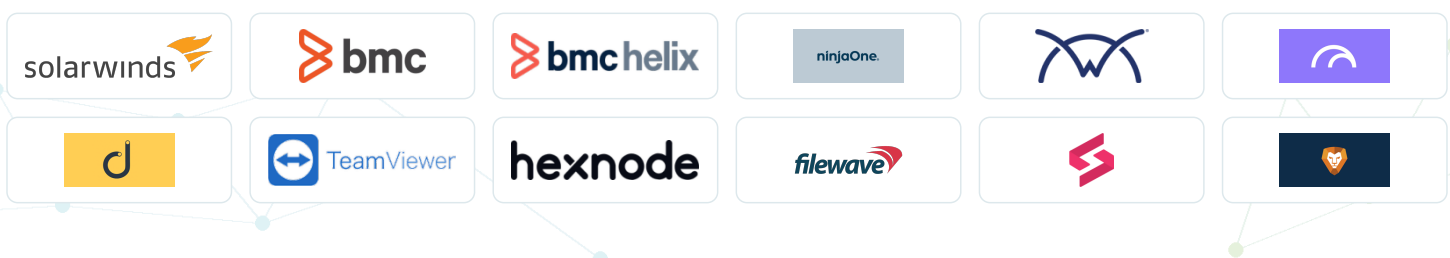

Security and continuity operations

Policy administration, alert review, recovery checks, vendor escalation and specialist security services aligned to your environment.

A flexible service model

Project support, retained services, co-managed IT, NOC coordination, transition assistance and skills transfer can be combined around your team.

PRODUCTS AND PLATFORMS

PILLAR 05 / STRATEGY AND PMO

IT strategy and project management

Turn operational priorities into a practical technology roadmap and a delivery plan your organization can follow.

Discover

People + process

Design

Options + risk

Deliver

Projects + acceptance

Evolve

Adoption + value

Governance, change control and delivery ownership throughout**Assess and prioritize**

Technology assessments, architecture reviews, process discovery and lifecycle planning identify dependencies, gaps and the most useful next steps.

ERP and transformation readiness

Requirements, process design, organizational readiness and change planning prepare the business for system adoption and wider transformation.

Govern delivery

CIO/CTO advisory, PMO support, vendor evaluation, scope control, project coordination, risk tracking and acceptance planning keep work accountable.

Enable lasting adoption

User training, documentation, operational readiness and handover help the new environment become part of everyday business.

**A clear plan. A controlled delivery.
An environment your team can own.**

PILLAR 07 / PHYSICAL SECURITY

Physical security and access control

Protect people and facilities with integrated surveillance, controlled entry and useful visibility for operators.

Entry points

Doors • gates • visitors

Video coverage

Cameras • analytics • VMS

Operators

Events • evidence • response

Access, surveillance and operating workflows designed together

Video surveillance

IP cameras, recording, video management, analytics, monitoring stations and storage, designed around site coverage and evidence retention.

Access and attendance

Door controllers, biometrics, credentials, visitor workflows, barriers and attendance systems connect physical controls with your operating processes.

Software House C • CURE

C•CURE is part of the Software House portfolio under Johnson Controls, providing enterprise access control and security management options.

Installation and integration

Site assessment, equipment placement, commissioning, permissions, event workflows and operator training support effective daily use; cabling is coordinated through our infrastructure pillar.

PRODUCTS AND PLATFORMS

PILLAR 07 / ENVIRONMENTAL MONITORING

Temperature, humidity and environmental monitoring

See conditions that affect your facilities, products and equipment, and notify the right people when action is needed.

Sense

Temperature • humidity

Log + notify

Dashboards • thresholds

Respond

People • procedures

Server rooms / Cold chain / Warehouses / Transport

Server rooms and facilities

Monitor temperature, humidity, leaks, power and supported sensor inputs, with dashboards and alerts aligned to operating thresholds.

Cold chain and sensitive storage

Freezers, chillers, warehouses, transport and laboratory storage can use connected monitors or portable dataloggers according to the application.

A broader monitoring range

UbiBot, AKCP, LogTag and Frigga provide options spanning wireless monitoring, sensor platforms, USB logging and shipment visibility.

Install, configure and hand over

Probe selection, connectivity, installation, notification rules, logging and user training are planned around the location and the monitoring objective.

PRODUCTS AND PLATFORMS

 UBIBOT AKCP
Est. USA 1981 LogTag® FRIGGA
Real Time Cold Chain Solutions

PILLAR 04 / FLEET AND FIELD SOLUTIONS

Fleet tracking and field intelligence

Connect vehicles, mobile assets, worksites and field teams so your business can respond to what is happening on the ground.

Live field visibility

- Vehicle location
- Fuel and driver insights
- Mobile assets
- Worksite intelligence

Fleet and vehicle visibility

GPS tracking, route history, geofences, vehicle status, utilization and maintenance information support dispatch and fleet coordination.

Fuel, cargo and asset monitoring

Fuel sensing, cargo conditions, asset tracking and exception notifications help identify loss, delays and operating issues.

Driver, workforce and worksite tools

Driver insights, supported video telematics, attendance, field activity, site assets and environmental sensing expand visibility beyond vehicle location.

From devices to decisions

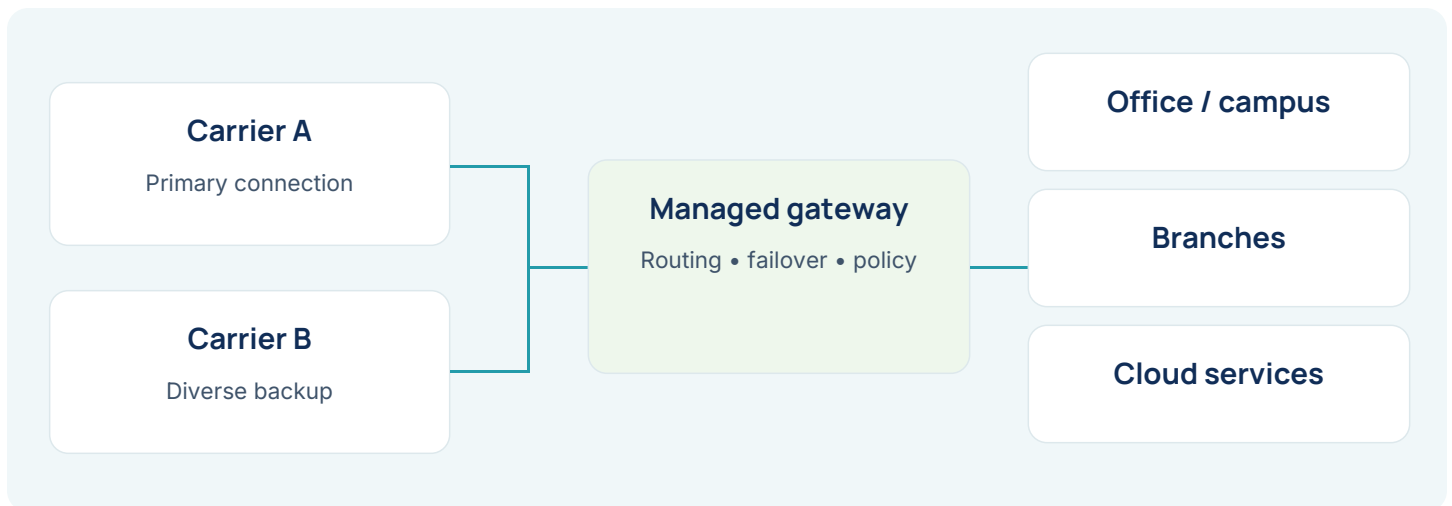

Tracking devices, sensors, gateways, dashboards, reports and integration options are assembled around your operating workflow and connectivity needs.

Vehicle telematics • Fuel monitoring • Mobile asset tracking

PILLAR 01 + 06 / MANAGED BUSINESS INTERNET

Managed business internet

Bring carrier selection, installation and ongoing connectivity management under a coordinated service approach.

Carrier choice for each location

Carrier-neutral sourcing across Philippine and international providers for business internet, dedicated access, leased lines and multi-site connectivity, subject to coverage and service availability.

Resilience and cloud access

Primary and backup circuits, failover, SD-WAN, private cloud connectivity and international circuits are designed around application priorities.

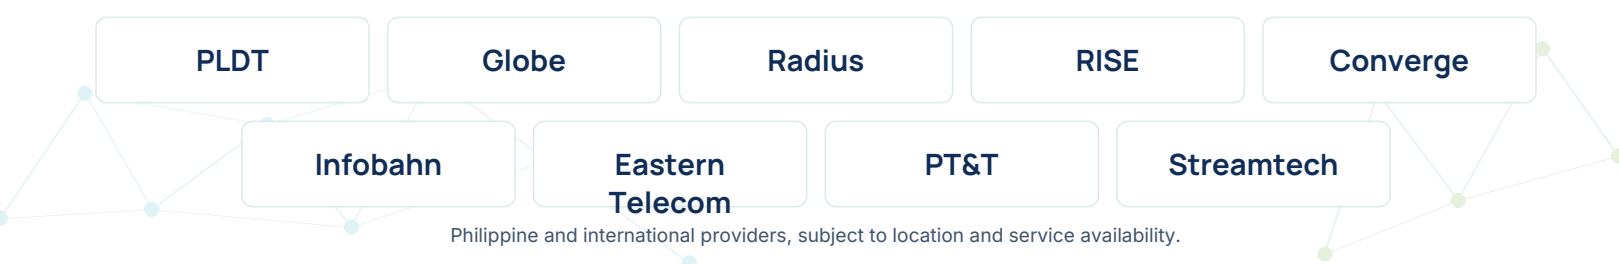

Installation and network readiness

Site surveys, carrier coordination, fiber and copper installation, gateway configuration, Wi-Fi and commissioning prepare the service for business use.

Ongoing service ownership

Monitoring, troubleshooting, carrier escalation, capacity review and service reporting simplify the management of multiple connections and providers.

CARRIER OPTIONS

DESIGNED AROUND YOUR OPERATIONS

Technology that fits your industry

Combine the eight pillars around the way your organization serves customers, manages information and gets work done.

Hospitality

Guest Wi-Fi, PMS integration, voice, IPTV, surveillance, access control and dependable property infrastructure.

Retail and distribution

ERP, POS, inventory, branch connectivity, barcode and label systems, eCommerce and customer engagement.

Manufacturing

ERP and production workflows, industrial connectivity, data protection, attendance and environmental visibility.

Healthcare and laboratories

Secure access, reliable infrastructure, protected records, collaboration and cold-chain monitoring.

Logistics and transportation

Fleet tracking, fuel and cargo monitoring, field tools, warehouse systems and multi-site connectivity.

Property and growing enterprises

Leasing workflows, business applications, office collaboration, managed IT and scalable site technology.

SPECIALIST DIGITAL SERVICES

Digital marketing, SEO and content support; aerial mapping, drone surveys and visual information for sites and assets.

PRACTICAL DELIVERY. CLEAR OWNERSHIP.

From discovery to everyday value

A delivery process that turns requirements into working systems, confident users and measurable business value.

Systems implementation

Training and handover

Operational technology

YOUR ROADMAP FROM IDEA TO IMPACT

1 Discover

Map priorities, processes and constraints.

Agreed requirements

2 Design

Fit the platform, integrations and controls.

Solution blueprint

3 Plan

Confirm scope, milestones and owners.

Delivery roadmap

4 Deploy

Configure, migrate and integrate.

Working environment

5 Validate

Test workflows, data and user readiness.

Accepted outcomes

6 Support

Train, hand over and improve.

Everyday value

Clear ownership • Practical documentation • Users prepared for change

SELECTED APPLICATION EXPERIENCE

Business systems. Real operating outcomes.

Applications shaped around the work people do and the information leaders need.

Pegi Waffles

Odoo implementation connecting CRM, sales, accounting, distribution and manufacturing.

A coordinated flow from customer demand to production and financial information.

Isaac Seed Philippines

Farmer monitoring and associated business workflows using Acumatica.

Better visibility across farmer relationships, field information and business processes.

King's Development Inc.

Office leasing and property-related business workflows.

Organized leasing information and connected processes supporting property operations.

Representative solution imagery; client references and project details are available on request.
